

Herbal

- To treat urinary symptoms of **BPH** (Benign Prostatic Hyperplasia)

- **Saw palmetto**: SE: dizziness, headache, N/V/C/D

- To treat Recurrent **UTI**

Cranberry:

Painful menstruation: or - **To treat Hot flashes caused by menopause**

Black cohosh : Contain high concentration of estrogen

serotonin syndrome

st john's wort and **ginko biloba** can cause

Ginkobilioba inhibit MAO A and B also **Ginko biloba**. Used in alzheimer.. Improve blood

St john's wort.. Anixolytic act like SSRI

Natural products for **hyperlipidemia**:

Garlic , red yeast rice ,**Fish oil** **also** To treat ADHD

Fish oil for hyperlipidemia & treat ADHD

Echinacea: Immunostimulant

- Supportive therapy for Respiratory tract infection

- To treat Common cold and flu

- To treat oral Ulcer

- In case of hard to treat superficial wounds

- supportive in liver disease

Milk thistle: Active of (Silymarin)

Feverfew: To treat Migraine headache

Herbal use for Amebiasis

Garlic ..blacktea ..coconut water..curcumin

Also : ipecac for Amebiasis

-

Drug in plant

Plant source use for acute gout: colchicine

Derived of belladonna: Atropine

Anti-malaria from natural source: Cinchona "quinine

Plant sources of anticancer:

Vinca Alkaloid: Vinblastine, Vincristine, Vindesine, Vinorelbine

Vincristine Fatal if given intrathecal ONLY IV infusion

Texans: Paclitaxel, Docetaxel

Plant origin (epipodophyllotoxin): Etoposide

Cough

Dry cough: Thyme

Plant used for cough relief:

Oil form eucalyptus tree

Stress: Chamomile, lavender, lemon

Herbal for **sedative:** Valerian ,Kava Kava

- To treat Anxiety and Depressant

: Kava Kava – Liferoot **Hepatotoxic Plant**

- **St. John's Wort:** SE: Liver microsomal enzyme inducer,,, with warfarin-???

Melatonin:

- To treat Sleep regulation in people work in different shifts

Plant used to **increase endurance** ⚡: **ginseng**

Natural products of burning ⚡: cool water, Aloe over ⚡, coconut oil ⚡, vinegar

Silver sulfadiazine FDA approved for wound infection and burn

Plant used to treat vomiting ⚡

Ondansetron like effect : **ginger** (zingiber officinalis)

Herbal interact with warfarin **decrease** INR S C G E Vit k

S...soya, st.jhon warts

C... co enzyme Q??

G... ginseng?Green tea

E...echinachea

- Co-enzyme Q10 also decrease (rhabdomyolysis) caused by statin

, To treat **Osteoarthritis**

Chondroitin + Glucosamine:

-

. - To **Prevent Neural tube** defect: Pregnant

Folic acid

- **Antioxidant**

Vitamin C-E + Beta carotene

:

tape worm

Pomegranate

Preparation

Prepare emulsion: continental, dry gum method, wet gum method

Not consider formation of suspension: use chelating agent

Boric acid in preparation: puffer

Vit c (ascorbic acid) preservative

Gums used in tableting as: Binding agent

Aspartame added to preparation as: sweetening agent

Bentonite used as: suspending agent and Rheological agent

Used to prepare suppository: Cocoa butter

Oleaginous base: white petroleum

Vegum ?

Natural emulsifying agent: Acacia

Methods:

Decoction: Extraction active material from plant by boiling

Miscibility: Liquid dissolved in liquid:

Levigation: grinding an insoluble substance to fine powder (dec. size) Tablet to powder:

Sublimation: Disintegration Freeze drying is done ... solid to vapor

-Example for polymers used in design of coated tablet and capsules :

A)Microcrystalline cellulose

B)Polyethylene glycol

C)Polyvinyl Alcohol

D)Cellulose acetate phthalate

Which of the following is the benefit from adding a conjugate of polyethylene glycol (PEG) in some medications like Peg-interferon?

- A) to extend the half-life of medications
- B) B, to extend the shelf-life of medications
- C) to enhance the effect of the medications
- D) to enhance the elimination of the medications

There is difference between shelf life & half life ..

polyethylene glycol (PEG) >>>>> surfactant & extend the half-life of medications by increase particle size

A 62-year-old patient, otherwise healthy, was brought to the Emergency Department in a confused state after ingesting one green fruit of castor bean two hours ago. He had vomit once at home. He had dryness of mouth and the pupils were bilaterally dilated with sluggish reaction to light. He was treated symptomatically with activated charcoal. Which of the following is the main active constituent responsible for the toxic effect of castor seeds?

- A. Ricin
- B. Barbaloin
- C. Mezeroin
- D. Ergotamine

What is the benefit of grape seeds ?

- A- antioxidant ☐

A 300 mg of the herbal medicine Aesculus (Horse Chestnut) tablet contains 22% of aescin. Which of the following disease can be treated effectively with this pharmaceutical preparation?

- A. hemorrhoids
- B. gastric ulcer
- C. cardiac arrhythmias
- D. irritable bowel syndrome

Trigenolla ➡ .negreek

Which of the following herbal medicines may cause oral carcinoma if chewed daily?

- A. areca nut
- B. clove buds
- C. menthe leaf

- A. fish oil
- B. palm oil
- C. peanut oil
- D. coconut oil

mega-6 fatty acid is present in:

- a. Evening primrose 𐀀
- b. Ginseng
- c. Aloe

Note :

- **Seaweed** and algae are important source for omega 3

Vit A: ➡ d liver oil

Nomenclature of atropa belladonna ..atropine .. due to **active ingredient**

Nomenclature of piper nigr (nigra means black) due to **color**

Volatile alkaloid : nicotine

hepatotoxic alkaloids,? pyrrolizidine

➤ Processing problems

- **capping** is the partial or complete separation of top or bottom crown from the main body of the tablet
- **lamination** is separation of a tablet into two _ or more distinct layers .These problems are usually caused by **entrapment of air during processing**
- **Mottling** is **unequal color distribution**, with light or dark areas standing out on an otherwise uniform surface.
This problem occurs when a drug has different color excipients or when a drug has colored degradation products.
- Colorants solve the problem but can create other problems.

DR: KABSHA ...PROMETRIC&PEARSON VUE
COURSE 00201064018621

- **Picking** is removal of the surface material of a tablet by a punch.
- **Sticking** is adhesion of tablet material to a die wall.
- These problems are caused by **excessive moisture** or the inclusion of substances with **low melting temperatures** in the formulation.
